STRAPPING ROLL PRODUCT GUIDE

Strong and secure packaging solutions for bundling
and transportation

ABOUT STRAPPING ROLL

Strapping rolls are durable packaging materials designed to securely bundle and stabilize products during storage, handling, and transportation. Made from strong and flexible material, they provide excellent tension strength and resistance against breaking under pressure. Suitable for industrial packaging, shipping, warehouse organization, and commercial use, strapping rolls ensure safe and reliable load securing for heavy-duty applications.

- **DESIGNED FOR HEAVY-DUTY PACKAGING & SHIPPING**

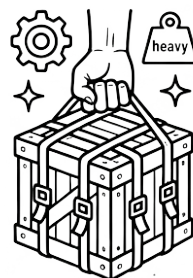

A strong and reliable solution for secure packaging and transportation needs.

Organization

• AVAILABLE SIZES

Available in practical roll options designed to support different packaging and transportation requirements.

Strapping Roll Size

1000 m

KEY FEATURES

Our strapping rolls are designed to provide strength, durability, and secure load handling for modern packaging and transportation needs. With high tension resistance and reliable material quality, they ensure safe performance during shipping and storage.

• FEATURE POINTS

- **High Tensile Strength**

Provides strong and secure bundling performance

- **Durable & Flexible Material**

Resistant to breaking under pressure and tension

- **Reliable for Shipping & Storage**

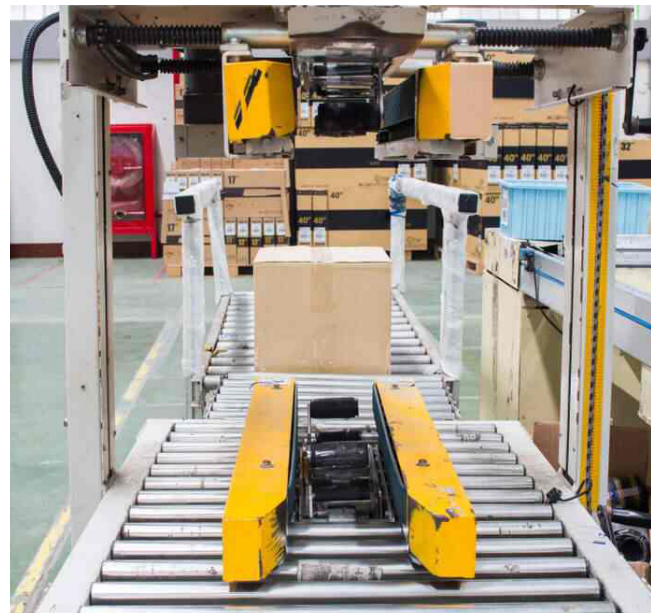

Keeps products stable during handling and transportation

- **Suitable for Industrial Applications**

Ideal for warehouse, logistics, and commercial packaging use

• PRODUCT SPECIFICATIONS

- **Material:** PP / PET strapping material
- **Usage:** Packaging and load securing
- **Durability:** High tension resistance
- **Protection:** Water-resistant properties
- **Availability:** 1000 m roll option

THANK YOU

Thank you for choosing Senasuma Polythene. We are committed to providing strong and reliable packaging solutions for your industrial and commercial needs.
