GYPSUM PRODUCT GUIDE

Reliable agricultural and industrial material for
improved productivity and performance

ABOUT GYPSUM

Gypsum is a versatile mineral material widely used in agriculture, cultivation, and industrial applications. It helps improve soil structure, supports healthy plant growth, and enhances cultivation conditions for better productivity. Suitable for mushroom cultivation, farming, construction, and manufacturing processes, gypsum provides reliable performance and efficient material support across various environments.

• DESIGNED FOR AGRICULTURAL & INDUSTRIAL APPLICATIONS

A dependable solution for improved cultivation, soil support, and industrial performance.

APPLICATIONS

Suitable for a wide range of agricultural, cultivation, and industrial applications, ensuring reliable performance and efficient usage.

• USAGE LIST

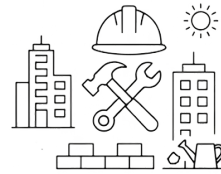

**MUSHROOM
CULTIVATION**

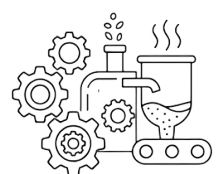

**AGRICULTURAL
FARMING**

**SOIL
CONDITIONING**

**CONSTRUCTION
APPLICATIONS**

**INDUSTRIAL
MANUFACTURING**

• AVAILABLE SIZES

Available in practical quantity options designed to support different agricultural and industrial requirements.

Gypsum Powder Pack Sizes

1kg
25 kg

KEY FEATURES

Our gypsum products are designed to provide reliable agricultural and industrial support for soil management, cultivation, and manufacturing applications. Carefully processed for consistent quality and effective performance.

• FEATURE POINTS

- **Improves Soil Structure**
Supports balanced and healthy growing conditions
- **Reliable Agricultural Support**
Suitable for cultivation and farming applications
- **Versatile Industrial Usage**
Ideal for construction and manufacturing processes
- **Consistent Material Quality**
Provides dependable and efficient performance

• PRODUCT SPECIFICATIONS

- **Product Type:** Gypsum
- **Usage:** Agriculture and industrial applications
- **Application:** Soil conditioning and cultivation support
- **Quality:** Processed for reliable performance
- **Availability:** 1 kg & 25 kg option

THANK YOU

Thank you for choosing Senasuma Polythene. We are committed to providing reliable agricultural and industrial solutions for productive and efficient operations.
